

# eSports - Formative HTML Assignment

Mr. Frey - Nov 21, 2022

**Goal:** To demonstrate the ability to create a basic HTML document with appropriate tags.

## Instructions:

For this assignment you will start with the default HTML document and then add in tags to create a web page that either promotes a video game console, or explains how to play a particular video game. All work must be school appropriate and should at least contain the following:

Tags that you need to demonstrate are:

- Standard outline of an HTML document (copy from w3Schools)
- Comments that will indicate appropriate student info (name, date etc)
- New Paragraph
- 3 different sizes of headings
- Formatting **bold**
- Formatting *italics*
- Formatting colour
- Hyperlink to a YouTube video that opens in a **new** window
- Hyperlink to a different site that opens in the **current** window
- Table that has multiple columns and rows with relevant information
- Pictures

**Day 1:** Pick an appropriate game of focus. Copy the standard HTML file to use as the template. Save it as an html file. Add in your comment tags at the top. Add in several headings to break down the sections. Add in a hyperlink that opens in the current window.

**Day 2:** Add information under each heading. Add in a table with appropriate information (this could be a comparison of prizes and values for each). Add a hyperlink that opens in a new window. Add in a picture. Check that you have formatted text appropriately. Submit the html file.

## Marking Scheme

- 1 Uses standard file format
- 2 Content is entered in the appropriate areas.
- 2 Comments that indicate basic student information
- 1 Saved as an html doc
- 3 Multiple heading sizes
- 1 Format in bold
- 1 Format in italics
- 1 Format in colour
- 1 Paragraphs
- 2 YouTube link in new Window
- 1 hyperlink in current Window
- 4 Table
- 2 Picture
- 5 Appropriate organization of information
